

Students' Names: _____

Industrialization Timeline

Use textbook Chapter 12 to create a timeline of industrial advancements after the Civil War - post 1865.

Be sure to include year

inventor or user

advancement/invention

brief definition/description of advancement/invention

The diagram shows a horizontal timeline represented by a thick black line. At the left and right ends of this line are short vertical bars. Five vertical tick marks are placed along the line, dividing it into four equal segments. Above the line, there are five empty rectangular boxes, each centered over one of the tick marks. Below the line, there are four empty rectangular boxes, each centered between two tick marks. This layout provides a structured space for students to record historical events in chronological order.
