How We Study
Title: ~~Pre~~ Prehistory Archaeology

- Human History - 5 mil. years
- EVOLUTION - gradual development of something to a more complex form
 - changes to a species that help them survive

HISTORY - study of the past

Why: ① understand where we come from
② prevent mistakes made in the past

ARCHAEOLOGY - study of the past based on what people left behind (Artifacts)

Explore areas where people once lived
Want to know where & how people:
worked, farmed, worshipped, traded

They study: Artifacts - made by people
Fossils - once alive
Primary Sources - from time period
Secondary Sources - written later

Archaeologists hypothesize & explain how people lived based on the evidence they find.
